## REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The pH range discussed in Kawajiri, with regard to preparation of the disclosed catalyst, is well outside of 7 to 10 since Kawajiri concerns distilled water, which contains an [H+] 20 times that of pure water, which is pH 7 (the lower limit instantly claimed). Therefore, those of ordinary skill would not be to modify Kawajiri to include an aqueous binder in the range of 7.0 to 10.0 in pH.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
